The first ten days

Bordbar, L.

I am a community midwife and working in a health sector in south of England. My work scope is very wide and includes different types of parents with different specifications. Many of them are young and primipara. I am working as community midwife for ten month. After start of my work, I gained complete knowledge for giving enough information about preconception cares to mothers. Many of clients obtained necessary information about pain and pre-eclampsia and eclampsia from reading of book. However, postnatal cares are very obvious but usually, explanations and advices about them are forgotten and even books don’t attend to them.
