\[\text{فصلنامه پزشکی و مامایی}\]
The image contains a page from a document written in Persian. Here is a transcription of the text in English:

"1. Community midwife
2. Guthrie
3. phenylketonuria"

The text is not fully visible, but it appears to be a list of medical terms or conditions. The context suggests it might be a part of a medical report or a list of conditions for a patient.
The first ten days

Bordbar, L.

I am a community midwife and working in a health sector in south of England. My work scope is very wide and includes different types of parents with different specifications. Many of them are young and primipara. I am working as community midwife for ten month. After start of my work, I gained complete knowledge for giving enough information about preconception cares to mothers. Many of clients obtained necessary information about pain and pre-eclampsia and eclampsia from reading of book. However, postnatal cares are very obvious but usually, explanations and advices about them are forgotten and even books don’t attend to them.

Keywords: Community midwife, Health education, Midwifery
